CATALOGUE NO. 13
AUGUST, 1974

TERMS OF SALE: All coins are available on approval to customers known to us. New customers should provide references and allow a few days for checks to clear our bank. On all approval orders, payment should be sent within three days of receipt of the coins. All coins are guaranteed as described, and we allow a full week's return privilege. Orders under $10.00 please add 35¢.

POSTAGE AND INSURANCE: We will pay postage on all domestic orders received with payment. Approval buyers will be billed for postage and insurance. Overseas orders will be billed for postage and registration. Payment in US dollars only.

All coins are subject to prior sale. We appreciate alternate choices and guarantee they will only be used as such.

COINS OF THE ARABIC STATES

THIS CATALOGUE represents our first exclusive listing of Arabic and related issues. We have long specialized in Arabic coins, and continue to collect several series for the numismatic challenge they present. With the tremendous surge in prices recently experienced by most world coinage series, Arabic coins represent one of the last frontiers for the collector/researcher. Date collecting is, at this stage, particularly unsophisticated with new, previously unreported dates being discovered regularly. And, in the more obscure series, a great deal of uncertainty remains concerning certain type coins. As an example, Yeoman lists two copper coins of Egypt struck at Cairo under the reign of Abdul Aziz. Y3a, the 20 Para, is very scarce, while Y2a, the 10 Para, is very rare. How many collectors know that a third coin in the series, a 40 Para, is also known to exist?

In addition to the numismatic challenge offered by Arabic coins, the prospects for price increases in the future seem relatively secure. As the Japanese and West European countries attained a prosperous economic status, their coinages suddenly enjoyed a popularity that sent prices spiraling upward. With the incomprehensible wealth lying below the sands of "Arabia", the growth of an indigenous group of collectors in those countries is only a matter of time.

Part of the present lack of interest in Arabic coins can surely be attributed to the difficulty in reading the Arabic alphabet and numbering system. These problems can easily be overcome as certain symbols reoccur regularly on most of the coins and can be easily recognized once you know what to look for. We will be glad to answer any questions you may have regarding Arabic coins and will, free of charge, attempt to attribute any coin which stumps the hometown panel.

We should also mention that we are very interested in buying Arabic coins. LET US KNOW WHAT YOU HAVE FOR SALE!!

*1086 TURKISH CITY COINS:
These coins were issued to commemorate the Sultan's visits to various cities in the Empire. They differ from the regular issues by the name of the city visited appearing above the regnal year instead of the normal "Constantinople".

Turkish city coins were struck in silver and gold and are VERY RARE. We have a nice collection of these rare pieces in silver and will quote a price to serious inquiries.
